DETAILED OFFICE ACTION

Applicant's amendment filed on 15 November 2005 is acknowledged and entered. Following the amendment, claims 3, 6, 9, 12 and 34-37 are canceled, and the new claims 38 and 39 are added.

Currently, claims 38 and 39 are pending and under consideration.

Withdrawal of Objections and Rejections:

All objections and rejections of claims 3, 6, 9, 12 and 34-37 are moot as the applicant has canceled the claims.

Conclusion:

Claims 38 and 39 are allowable.

Quayle Action

This application is in condition for allowance except for the following formal matters:

It is noted that there are eight submissions of sequence listing (paper copy) in the present application. The original sequence listing filed on 7/31/01 has four sequences: SEQ ID NO:5, a nucleic acid sequence having 775 nucleotides; SEQ ID NO:6, a nucleic acid sequence having 792 nucleotides; SEQ ID NO:10, a polypeptide sequence having 230 amino acids; and SEQ ID NO:11, a polypeptide sequence having 263 amino acids. The subsequent 6 submissions, filed on 12/10/02, 2/3/03, 3/10/03, 4/29/03, 9/11/03 and 11/28/03, are identical, and they introduced major difference in comparison to the originally filed sequence listing, which is acknowledged by applicants in the statement filed on 8/2/04. Attempting to correct the sequence error, Applicants filed the 8th sequence listing on 8/2/04 with the statement indicating that it is the same as that on CRF. However, upon further review, the examiner notes that the most recent paper submission (the 8th) filed on 8/2/04 is different from the original sequence listing submitted on 7/31/01 although it is the same as that on CRF. In the most recent submission, SEQ ID NO:5 is a nucleic acid sequence having 776 nucleotides (with an additional "a" at the 3'-end of the

Art Unit: 1646

molecule comparing to the original nucleic acid of SEQ ID NO:5); SEQ ID NO:6 is a polypeptide sequence having 231 amino acids (with an additional "M" at the N-terminal of the molecule comparing to the original SEQ ID NO:10, and the original SEQ ID NO:6 is a nucleic acid sequence having 792 nucleotides); SEQ ID NO:10 is a nucleic acid sequence having 792 nucleotides (whereas the original SEQ ID NO:10 is a polypeptide sequence having 230 amino acids). Therefore, it seems that applicants have introduced new matter to the original disclosure as the most recent paper submissions of sequence listing and CRF do not match the original sequence listing. Applicants are required to re-submit 1) paper copy of the sequence listing, 2) CRF copy of the sequence listing, and 3) a statement that the content of the paper and CRF copies are the same, and include no new matter. Applicant must comply with the requirements of the sequence rules (37 CFR 1.821 - 1.825) before the application can be allowed. See the attached Notice To Comply With The Sequence Rules.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

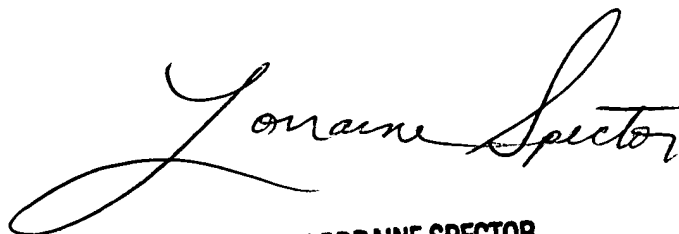

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
